PROFILE

Software Engineering student with strong foundation in backend development using Go and Python. Experienced in building REST APIs, database-driven applications, and academic projects. Currently focused on developing scalable web applications and improving system design skills.

EDUCATION

BSc in Software Engineering at Adama Science And Technology University(ASTU)

Expected Graduation: 2028

TECHNICAL SKILLS

Database

PostgreSQL, MySQL, MongoDB

Programming Language

Go, Python, Java, Javascript

Framework

Gin, Django (basic), Express.js (basic)

Tools

Git, GitHub, Linux, Docker (basic)

INTERESTS

Machine Learning | AI Agents | Backend Systems

PROJECTS

Leather College Portal

Developed a college portal system for managing academic workflows and structured data operations. Focused on backend organization, database handling, and building a maintainable system architecture.

Github: <https://github.com/Anom-a/light-institute-platform>

Orchestrix

Built a system-focused application for organizing backend processes and workflow coordination. Emphasized modular architecture, clean structure, and clear separation of responsibilities across the system.

Github: <https://github.com/Anom-a/orchestrix>

Rate My Professors

Developed a platform for submitting and viewing professor ratings with structured data management. Focused on handling user-generated content, backend logic, and organized data models for storing and retrieving reviews.
